SECTION 1 CONFLICT MINERALS DISCLOSURE

Item 1.01 Conflict Minerals Disclosure and Report

International Game Technology PLC (the “Company”) has filed a Conflict Minerals Report, filed as Exhibit 1.01 hereto.

Conflict Minerals Disclosure

This Form SD and the Company’s Conflict Minerals Report, filed as Exhibit 1.01 hereto, are publicly available at www.igt.com as well as the SEC’s EDGAR database at www.sec.gov.

Item 1.02 Exhibit

The Conflict Minerals Report required by Item 1.01 is filed as Exhibit 1.01 to this Form SD.

SECTION 2 EXHIBITS

Item 2.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: June 1, 2020

INTERNATIONAL GAME TECHNOLOGY PLC
(Registrant)

By: /s/ Pierfrancesco Boccia
Pierfrancesco Boccia
Company Secretary

International Game Technology PLC
Conflict Minerals Report
For the Year Ended December 31, 2019

This Conflict Minerals Report (this “Report”) for the year ended December 31, 2019 of International Game Technology PLC (the “Company”), a public limited company organized under the laws of England and Wales, is presented to comply with Rule 13p-1 (the “Rule”) under the Securities Exchange Act of 1934, as amended (“Exchange Act”).

Unless otherwise indicated or the context otherwise requires, as used in this report, the terms “we,” “us,” and “our” refer to International Game Technology PLC and its subsidiaries.

As used in this Report:

- “Conflict Minerals” means columbite-tantalite (coltan), cassiterite, wolframite, or their derivatives (which are limited to tantalum, tin, and tungsten), and gold, that are necessary to the functionality or production of a product;
- “Covered Countries” means the Democratic Republic of the Congo (“DRC”) and adjoining countries;
- “Covered Products” means our manufactured land-based machine products (including, but not limited to, slot machines, video poker machines, video lottery terminals, electronic or video bingo machines, lottery terminals, instant ticket vending machines, and ticket scanners);
- “CFSP-Compliant Smelters” means that the smelter/refinery is registered with CFSP and their sourcing of 3TG is compliant with CFSP assessment protocols; and
- “Reporting Period” means the year ended December 31, 2019.

Pursuant to the Rule, and as further described below, we undertook due diligence measures on the source and chain of custody of Conflict Minerals contained in Covered Products that we had reason to believe may have originated from the Covered Countries and may not have come from recycled or scrap sources.

SEC Final Rule on Conflict Minerals

The Rule was adopted by the Securities and Exchange Commission (“SEC”) to implement reporting and disclosure requirements related to “conflict minerals” as directed by Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants whose products contain Conflict Minerals, excepting Conflict Minerals that, prior to January 31, 2013, were located “outside of the supply chain” (as defined in the Rule). For products that contain Conflict Minerals, the registrant must conduct in good faith a reasonable country of origin inquiry designed to determine whether any of the Conflict Minerals originated in any of the Covered Countries. If, based on such inquiry, the registrant knows or has reason to believe that any of the Conflict Minerals contained in its products originated or may have originated in a Covered Country and knows or has reason to believe that those Conflict Minerals may not be solely from recycled or scrap sources, the registrant must conduct due diligence on the source and chain of custody of those minerals.

1. Company and Product Overview

We are a global gaming company that delivers entertaining and responsible gaming experiences for players across all channels and regulated segments, from gaming machines and lotteries to sports betting and digital. We have a well-established local presence and relationships with governments and regulators in more than 100 countries around the world. We operate and provide an integrated portfolio of innovative gaming technology products and services, including: lottery management services, online and instant lottery systems, gaming systems, instant ticket printing, electronic gaming machines, sports betting, digital gaming, and commercial services. The Company is headquartered in London, with principal operating facilities located in Providence, Rhode Island; Las Vegas, Nevada; and Rome, Italy.

Based upon our internal assessment, the Rule applies to materials used in the Covered Products. Hardware purchased for installation with our systems technology products is not manufactured or contracted for manufacture by us; consequently, the policies and procedures described in this Report have not been applied to our systems technology products.

We recognize that the use of Conflict Minerals is necessary in the production of the Covered Products. We seek to ensure that any Conflict Minerals within the manufacturing process for our Covered Products that originate from the Covered Countries are CFSP-Compliant. In furtherance of the foregoing, we have implemented policies and procedures to comply with the Rule requirements, including a Conflict Minerals Policy.

2. Conflict Minerals Diligence Program and Due Diligence Process

The due diligence program we use to identify and trace the Conflict Minerals in our supply chain for Covered Products is based on procedures and tools provided by the Electronic Industry Citizenship Coalition (“EICC”), the Global e-Sustainability Initiative (“GeSI”) and the Organization for Economic Cooperation and Development (“OECD”). For the Reporting Period, we requested that suppliers whose products contain Conflict Minerals submit information to us using the Conflict Minerals Reporting Template (version 5.11) (the “Template”) of the Responsible Minerals Initiative (“RMI”), which was founded by members of the EICC and GeSI. The Template is a standardized reporting template developed by the RMI that facilitates the transfer of information through the supply chain regarding mineral country of origin and smelters and refiners being utilized. The Template was developed to facilitate disclosure and communication of information regarding smelters that provide minerals to a company’s supply chain. It includes questions regarding a company’s CFSP-Compliant policy and engagement with its direct suppliers as well as a listing of the smelters used by the supplier and its sub-suppliers. In addition, the Template contains questions regarding the origin of Conflict Minerals included in suppliers’ products as well as supplier due diligence. We request that our suppliers adopt a conflict minerals policy to reasonably assure that the Conflict Minerals in the products they manufacture are compliant (“CFSP-Compliant”) with the Conflict-Free Smelter Program (“CFSP”) assessment protocols set by the Responsible Minerals Initiative (“RMI”). We request suppliers to set forth in their policies their responsibility for establishing a due diligence program to ensure CFSP-Compliant supply chains, and suppliers are requested to report their due diligence efforts to us. We review responses and maintain records of our due diligence activities as well as responses. We expect suppliers to take similar measures with their suppliers to ensure alignment throughout the supply chain.

We request confirmation from suppliers that they have adopted a conflict minerals policy and are in compliance with such policy in all material respects. We retain the right to use alternate suppliers in the event a supplier is unwilling or unable to comply with our requests. We also request that our suppliers report their due diligence efforts to us for identifying the supply chain of Conflict Minerals within their process as well as their findings. We may conduct audits of certain suppliers to ensure consistency with our policies and supplier requirements.

Our due diligence process defines steps and review processes deemed necessary for us to comply with the Rule. Our due diligence policies, procedures and processes have been developed with consideration of the second edition of the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (“OECD Guidance”) and the related supplements for Conflict Minerals. Specific procedures include defining suppliers that are affected by Conflict Minerals, identifying risks, communicating supplier responsibilities, utilizing a cross-functional team, collecting necessary information, and maintaining records of activity, responses and conclusions.

Suppliers are responsible for reporting due diligence efforts by completing and submitting the Template and a conflict minerals policy to us. In connection with the foregoing, our cross-functional team undertakes the following activities:

- identifies which suppliers provide products to us containing Conflict Minerals;
- distributes a Conflict Minerals letter with an environmental policy and a link to the RMI form to all suppliers determined to be in scope;
- tracks which suppliers have responded and retains the suppliers’ completed Template and policies;
- reviews responses and conducts further diligence if warranted;
- maintains smelter information from suppliers and checks smelter identifications against the Compliant Smelter & Refiners list (at www.conflictreesourcing.org) and the Smelter Reference list of the current RMI Conflict Minerals Reporting Template; and
- reports to senior management annually with respect to the due diligence process and compliance obligations.

3. Description of Due Diligence Measures Performed

Below is a description of the measures we performed for the Reporting Period to exercise due diligence on the source and chain of custody of Conflict Minerals contained in the Covered Products that we had reason to believe may have originated from the Covered Countries and may not have come from recycled or scrap sources.

To identify relevant suppliers subject to due diligence, we reviewed 582 suppliers in which over 95% of production of the Covered Products occurs. Starting with 582 suppliers, we removed suppliers from whom we did not purchase materials for the Covered Products during the Reporting Period. Suppliers were determined to be out of scope if the materials purchased from them either did not contain Conflict Minerals or were not included in any of the Covered Products. If any uncertainty remained as to potential inclusion of any Conflict Minerals contained in materials purchased from a supplier for the Covered Products, the supplier was considered in scope. As a result of this analysis, we identified 43 suppliers who provided over 95% of our 2019 annual spend to be in scope and subject to further due diligence.

We surveyed the 43 in-scope suppliers using the Template, requesting that each submit information requested by the Template and a Conflict Minerals policy. We continued to follow up with the in-scope suppliers through follow-up requests until May 1, 2020. We received responses from suppliers accounting for approximately 95.22% of the aggregate amount we spent in 2019 on direct material purchases. As a result of this process, we received responses from 42 suppliers. The responses included 42 EICC/GeSI declarations and 23 Conflict Minerals policies. 40 suppliers provided smelter documentation. Among the suppliers providing smelter documentation, 772 smelters were identified, of which 329 have been verified by CFSI as CFSP-Compliant smelters. The remaining 443 smelters identified are not currently verified as CFSP-Compliant by RMI. Please refer to Appendix A for additional information regarding smelter names, country location, and mineral.

We do not have a direct relationship with smelters and refiners, nor do we perform direct audits of these entities that provide us with Conflict Minerals through our supply chain. We rely upon our direct suppliers (and their suppliers) as well as industry efforts, such as EICC and CFSI, to influence smelters and refineries to become certified through the CFSP.

4. Reasonable Country of Origin Inquiry (“RCOI”)

We analyzed our products and found that Conflict Minerals can be found in the Covered Products. Therefore, the Covered Products are subject to the reporting obligations of the Rule and are covered by this Report. Hardware purchased for installation with our systems technology products is not manufactured or contracted for manufacture by us and consequently such products are not subject to the Rule or covered by this Report.

In connection with the RCOI, we determined that it may take time for some of our suppliers to verify the origin of Conflict Minerals they supply directly or indirectly to us for use in our products as some of the supplier’s source material from many sub-suppliers. Further, as part of the RCOI process, we adopted the RMI industry approach and traced back the origin of Conflict Minerals by identifying smelters, refineries or recyclers and scrap supplier sources. We used the RMI and its CFSP to trace the mine of origin of the Conflict Minerals to its original source. The CFSP audits smelters and refineries to ensure that all certified smelters and refineries only use ores that are DRC conflict free.

The results of our RCOI are set forth in Appendix A. The suppliers that provided smelter documentation to us indicated that, with three exceptions, the Conflict Minerals supplied to them did not originate from any smelters located in any of the Covered Countries. One supplier indicated that tantalum was supplied to them from Phoenix Metals Ltd. located in Rwanda, which is a Covered Country. Eight suppliers indicated that gold was supplied to them from Universal Precious Metals Refinery located in Zambia, which is a Covered Country. Eight suppliers indicated that gold was supplied to them from African Gold Refinery located in Uganda, which is a Covered /Country. One of these three supplier smelters, Phoenix Metals Ltd. located in Rwanda, is not currently verified as CFSP-Compliant by RMI; the other two noted above are. This supplier did not confirm whether any of the tantalum supplied to them from Phoenix Metals Ltd. was supplied to us during the Reporting Period. Tantalum is included in most of our Covered Products and is sourced from multiple suppliers. We are unable to trace, without unreasonable effort, which of the Covered Products included tantalum from these suppliers during the Reporting Period.
